# **Notes on Use of Antenna**

WA103000XA

This document describes on proper antenna direction as well as the location of installation. Adjust direction of the antenna according to how you have installed the unit.

# 1. Location of Installation

#### When placing the unit on a table

Place the unit on a table with good line of sight.

Do not place the unit on tilted or unstable surfaces.

#### When hanging the unit on a wall

Hang the unit on higher position of the wall to make sure of a good line of sight.

- \* The screws do not come with the unit. They need to be purchased separately.
- \*The unit may drop if it is not firmly hung on a wall. After hanging the unit on the screws, slightly move the unit horizontally and vertically to make sure it is fastened.

# 2. Change the Antenna Direction

## When placing the unit on its bottom

#### **NOTE**

- \* Do not push the antenna to a wrong direction.
- \* When you turn the antenna, please be sensitive to the limit of its stopper.

### When hanging the unit horizontally on a wall

#### NOTE

- \* Do not push the antenna to a wrong direction.
- \* When you turn the antenna, please be sensitive to the limit of its stopper.

### When hanging the unit vertically on a wall
