#### **Name of Parts**

(1) Push Switch

(2) Ethernet Address

- (3) STATUS LED (Orange)
- (4) LINK LED (Green)
- (5) AC Connector
- (6) Network Port
- (7) USB Port

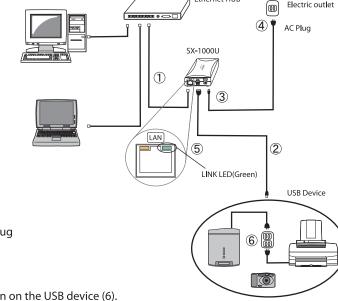

### Step1: Install this product and a USB device

Step1 explains how to connect this product to a USB Device and the Network.

1. Please prepare the following before setup: Ethernet HUB, Network cable, USB cable.

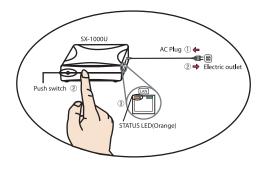

- \* If this product has been used in another network, reset it to factory default prior to setup (see below)
- 2. Connect the network cable from an Ethernet HUB to this product (1).
- 3.Use a USB cable to connect this product to a USB device (2).
  - \* USB devices using isochronous transmission, such as a web camera or a speaker device, are not supported.
  - \* If a USB HUB is connected to this product, two or more USB devices can be connected.
- \* Some USB devices may not be supported depending on the USB device driver specification. Please refer to our web site for the latest compatibility information
- 4. Connect the power supply to this product (3), and then insert the AC Plug into the electric outlet (4). Check that the LINK LED(Green) light is on (5).
  - \* Please do not use an AC adapter other than the one that came with this product.
- 5.If the USB device requires external power, connect the power supply. Turn on the USB device (6).

#### To reset to the factory default settings

- 1.Remove the AC plug from the electric outlet.
- 2. Push and hold the push switch while re-inserting the AC plug into the electric outlet. Continue holding.
- 3.The STATUS LED(Orange) will light when the factory default configuration settings have been restored. Release the push switch.

## Step2: Before setup...

By default, this product automatically obtains an IP address from the network device that has the DHCP server function.

There is no need to configure this product when obtaining the IP address automatically. Please install the application (refer to "SX Virtual Link User's Guide").

Please proceed to step3 when setting the IP address manually or when you are not sure if the IP address can automatically be

- \* Before proceeding to step3, please temporarily disable the firewall function of the PC to be used for the configuration. Some of the procedure to disable the firewall is provided in FAQ on our homepage.
- Standard Windows XP firewall
- Commercial security software's firewall function
