SX-3000GB

S/N: YYYYYYYYY
silex technology,Inc.

(7) (8)

(1) USB port
(2) POWER LED
(3) LINK LED
(4) Push switch
(5) Network port
(6) Power connector
(7) Ethernet address
(8) Serial Number

Step1 : Install this product and a USB device

Step1 explains how to connect this product to a USB Device and the Network.

1.Please prepare the following before setup: Ethernet HUB, Network cable, USB cable.

Ethernet HUB   Network cable   USB cable

* If this product has been used in another network, reset it to factory default prior to setup (see below).

2. Connect the network cable from an Ethernet HUB to this product (1).

**3.** Use a USB cable to connect this product to a USB device (2).

* Some USB devices may not be supported depending on the USB device driver specification. Please refer to our web site for the latest compatibility information.
* Only 1 device can run on bus power.

4. Connect the power supply to this product (3), and then insert the AC Plug into the electric outlet (4). Check that POWER LED and LINK LED turn on (5).

* Please do not use an AC adapter other than the one that came with this product.

**5.** If the USB device requires external power, connect the power supply. Turn on the USB device (6).

AC Plug ④
③
⑤ LAN
POWER LED   LINK LED

To reset to the factory default settings

1. Remove the AC plug from the electric outlet.

2. Push and hold the push switch with a fine tipped object such as a pen or pencil while inserting the AC plug into an outlet. Continue holding.

3. When the LINK LED (Green) starts to blink, the factory default configuration is complete. Release the push switch. Release the push switch.

Push switch

Step2 : Before setup . . .

By default, this product automatically obtains an IP address from the network device that has the DHCP server function.

There is no need to configure this product when obtaining the IP address automatically. Please install the application (refer to **"SX Virtual Link User's Guide"**).

Please proceed to step3 when setting the IP address manually or when you are not sure if the IP address can automatically be obtained.

* Before proceeding to step3, please temporarily disable the firewall function of the PC to be used for the configuration. Some of the procedure to disable the firewall is provided in FAQ on our homepage.
 - Standard Windows XP firewall
  - Commercial security software's firewall function

Step3 : Configure the IP Address

Step3 explains how to configure the IP address using the configuration utility in the Device Server Setup CD.
Configuration can be done on either a Windows or Macintosh environment.

<<< Windows environment >>>

1. Please insert the Device Server Setup CD into your PC.

2.
Device Server Setup CD
✦Contents

Please select **Device Server Setup** from the menu.

   * If the screen does not appear automatically, open My Computer, select the CD-ROM drive and execute Autorun.exe.
